

01 | Working student as Embedded Linux Developer (m/f/d)

jusst.engineering is an engineering studio specializing in embedded systems and mobile app development for audio, voice and video streaming, processing and signal distribution. We build the link between audio brands and recent technologies like Google Chromecast built-in, Spotify Connect, Apple AirPlay 2 and many more. Our customers are mainly well established hi-fi brands, recording studio equipment manufacturers as well as computer vision and robotics companies.

To further grow our engineering team, we are currently looking for smart people with a passion for embedded and low-level software engineering.

01.1 | Your tasks (depending on knowledge)

- Develop, adjust and extend embedded Linux systems for audio streaming integration
- Develop audio and video processing software on different platforms (Linux-based as well as bare metal)
- Participate in the team's code review process for highest code quality and frequent feedback
- Generate code documentation that is worth to be read
- Make use of git's capabilities for accurate code versioning and history tracking

01.2 | Handy skills

- C/C++
- Linux
- Rust
- Motivation to solve problems and to learn new things
- English language (internal language: usually German)

01.3 | What you can expect from us

- An engineering team of Uni Hamburg/Informatikum alumni
- Respectful and friendly manners
- An opportunity to learn and grow in varied and challenging projects
- A nice backyard loft style office in Hamburg Eimsbüttel, 15 minutes bus ride from the Informatikum
- Salary between 15 and 22 €/h, depending on qualification
- Flexible working hours adjustable to your study situation (more than 20 h per week possible during semester breaks)
- Takeover after studies possible

01.4 | Your application ...

should be an e-mail in which you shortly present yourself and your skills. It is important for us to get an impression of who you are and whether there is good chemistry.

If you are interested in the job, please write to jobs@jusst.de.
Your contact is Sebastian Scheel.
