

01 | Working student as Mobile Developer (m/f/d)

jusst.engineering is an engineering studio specializing in embedded systems and mobile app development for audio streaming, audio signal distribution and voice interface solutions. We build the link between audio brands and recent technologies like Google Chromecast built-in, Spotify Connect, Apple AirPlay 2 and many more. Our customers are mainly well established hi-fi brands, recording studio equipment manufacturers and robotics companies.

To further grow our engineering team, we are currently looking for smart people with a passion for application development.

01.1 | Your tasks

- Development, adjustment and extension of mostly Flutter-based mobile apps for iOS and Android, targeting the remote control of embedded systems like smart speakers
- Transfer of UX design concepts into actual applications
- Participate in the team's code review process for highest code quality and frequent feedback
- Generate code documentation that is worth to be read
- Make use of git's capabilities for accurate code versioning and history tracking

01.2 | Your skills and qualifications

- Flutter - or the will to learn it
- Android
- iOS
- Motivation to solve problems and to learn new things
- English language (internal language: usually German)

01.3 | What you can expect from us

- An engineering team of Uni Hamburg/Informatikum alumni with no hierarchical fuss
- Respectful and friendly manners
- An opportunity to learn and grow in varied and challenging projects
- Free choice of hardware and operating system
- A nice backyard loft style office in Hamburg Eimsbüttel, 15 minutes bus ride from the Informatikum
- Salary between 15 and 22 €/h, depending on qualification
- Flexible working hours adjustable to your study situation (more than 20 h per week possible during semester breaks)
- Takeover after studies possible

01.4 | Your application...

...should be an e-mail in which you shortly present yourself and your skills. It is important for us to get an impression of who you are and whether there is good chemistry.

If you are interested in the job, please write to jobs@jusst.de.

Your contact is Sebastian Scheel.
